

ENTERPRISE ESCAPE

You are on the bridge of the deserted Starship Enterprise. The engines are out and the Enterprise in a decaying orbit. You must start the engines and save the ship, get off the ship, or die!

INSTRUCTIONS:

To load: Type "LOAD", then press RETURN key (no name required). You may have to adjust the volume settings and remember to have the tone on high. Once the game has loaded, stop the tape and RUN the game.

To play: This is a typical adventure game where the computer will follow your instructions in English as long as you use small two word commands — anything else will be ignored.

A usual command consists of a verb followed by a noun. For example "GO" followed by a direction or a place. "TAKE" or "DROP" followed by an object, and so on.

Remember to map out where your character has been and what he has seen and found there, and if you do get stuck, ask somebody else for help — two heads are better than one.

NOTE: As this program is in BASIC you may break into it. But be warned if you do, you will lose your position and have to start all over again.
